

**Table of Contents of the book “Weber's Electrodynamics”,
A. K. T. Assis (Kluwer Academic Publishers, Dordrecht, 1994), 288 pages, ISBN: 0-7923-3137-0**

Preface

Chapter 1: Vector Analysis

- 1.1 Definitions and Notation
- 1.2 Vector Algebra
- 1.3 Gradient
- 1.4 Divergence, Curl and Laplacian
- 1.5 Integral Calculus
- 1.6 The Dirac Delta Function
- 1.7 Cylindrical and Spherical Coordinates

Chapter 2: Review of Classical Electromagnetism

- 2.1 Introduction
- 2.2 Equations of Motion
- 2.3 Electric and Magnetic Forces
- 2.4 Lorentz's Force Law
- 2.5 Maxwell's Equations
- 2.6 Derivation of Gauss's Law

Chapter 3: Weber's Electrodynamics

- 3.1 Wilhelm Weber and His Electromagnetic Researches
- 3.2 Weber's Force
- 3.3 Weber's Potential Energy
- 3.4 Conservation of Linear Momentum, of Angular Momentum and of Energy
- 3.5 Lagrangian and Hamiltonian Formulations of Weber's Electrodynamics
- 3.6 Maxwell and the Electrodynamics of Weber

Chapter 4: Forces of Ampère and Grassmann Between Current Elements

- 4.1 Ampère's Force Between Current Elements
- 4.2 Derivation of Ampère's Force from Weber's Force
- 4.3 Grassmann's Force and Biot-Savart's Law
- 4.4 Derivation of Grassmann's Force from Lorentz's Force
- 4.5 Ampère Versus Grassmann
- 4.6 Force Between Circuits from the Coefficient of Mutual Inductance
- 4.7 Derivation of the Magnetic Circuital Law and of the Law of Nonexistence of Magnetic Monopoles
- 4.8 Modern Experiments Related to the Controversy Ampère Versus Grassmann

Chapter 5: Faraday's Law of Induction

- 5.1 Faraday's Law
- 5.2 Franz Neumann
- 5.3 Derivation of Faraday's Law from Weber's Force
- 5.4 Derivation of Faraday's Law from Weber's Electrodynamics Without Utilizing Fechner's Hypothesis

Chapter 6: Forces of Weber and of Lorentz

6.1 Introduction

6.2 Retarded and Liénard-Wiechert's Potentials

6.3 Derivation of Grassmann's Force from the Liénard-Schwarzschild's Force

6.4 Comparison Between Weber's Force and Liénard-Schwarzschild's Force

6.5 Two Charges in Uniform Rectilinear Motion

6.6 Electric Field Due to a Stationary, Neutral and Constant Current

6.7 Weber's Law and Mass Variation

6.8 Darwin's Lagrangian

Chapter 7: Important Topics Related to Weber's Law

7.1 Two Body Problem According to Weber's Law

7.2 Motion of a Charge Orthogonal to the Plates of a Capacitor

7.3 Charged Spherical Shell

7.4 Centrifugal Electrical Force

7.5 Weber's Law Applied to Gravitation

7.6 Mach's Principle

7.7 The Mach-Weber Model

Chapter 8: General Discussion

8.1 Weber's Electrodynamics and Maxwell's Equations

8.2 Action at a Distance Versus Contact Action

8.3 Weber's Electrodynamics in Terms of Fields and Retarded Time

8.4 Weber's Law and Plasma Physics, Quantum Mechanics, Nuclear Physics, Etc.

8.5 Limitations of Weber's Electrodynamics

Appendix A: The Origins and Meanings of the Magnetic Force

Appendix B: Alternative Formulations of Electrodynamics
